

Introduction

We greatly value the time that you put into these assignments. The technical part of the interview will build upon your submission.

Evaluation Criteria

This evaluation is intended to allow you to demonstrate practical JAVA coding skills, including how you structure your solution. We value clean code that is easy to understand and extend. We also value appropriate test coverage where applicable.

Setup

This assignment needs JAVA 1.8 +. This zip file is a Maven Project which can be directly opened in any IDE (IntelliJ Idea or Eclipse or any other IDE supporting Maven).

This project has 2 classes

- MonthInterval. This class has the main method and logic.
- MonthIntervalTest. This class has all the unit tests. Feel free to add more unit tests if you want.

Assignment : Months in Interval Between Two Dates

Create a function that, given two dates, returns a sorted list of names of the months that are present between them (inclusive).

Implement your code in the method **generateMonthsInInterval** of Class **MonthInterval**.

Thank you and good luck!
